## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The various *Mucuna pruriens* agents instantly claimed.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicants must elect a particular agent from *Mucuna pruriens* seeds (i.e.- elect a component, substance, fraction, extract, or molecule). If applicants elect an extract, they must elect a particular extract, such as those recited in claims 38 and 39. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1655

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The species listed above are distinct, each from the other. For example, an extract from *Mucuna pruriens* seed is not necessarily the same as a component, fraction, substance, or molecule from *Mucuna pruriens* seed. Likewise, the particular extracts listed in claims 38 and 39 are produced using different methods and therefore would not all contain the same functional agents.
